

# ***Vertical ceiling lift systems***

## ***for flat panels***

***Hide your flat panel after use!***

*Hide any flat panel with the Audipack vertical ceiling lift systems.*

*Available for any size of flat panel.*

**Audipack®**

*It's great to have solutions...*

an **awesome** sight for any

first time **spectator!**

Shown model is a 103" ceiling lift.

Available 103" models:

P3940 (vertical lift)

P5140 (vertical lift and tilt!)

- ▲ **Hidden comfort**
- ▲ **Optional rotation and electric ceiling hatch**
- ▲ **Available up to 108"**
- ▲ **Very slim finishing**
- ▲ **Anti drop safety device**

*These lifts systems lowers a flat panel vertically from above the ceiling...*

A luxurious, silent and durable lift system suitable for lowering your flat panel from the ceiling.

The lift is standard equipped with dropdown safety device and ceiling finishing aid. The lift is silent because of its low voltage motors. Only components of the highest quality are used to assure a durable, reliable and low maintenance system.

A hatch that opens the ceiling before the flat panel is lowered is available as an option, as well as electric rotation and inclination of the flat panel (please see price list).

For larger screens up to 108" the system is custom made for the best solution in any situation.

To control the system other than relais contact, please select the below list remote controls.

**Ref. 260214** (Internal IR remote control set, for lift + hatch)

**Ref. 260215** (Internal RF remote control set, for lift + hatch)

*To install your flat panel to an Audipack product an additional flat panel bracket is needed.*

*See chapter "Mounting brackets for flat panels" on page 29 for an overview of the available brackets.*

## VERTICAL LIFT SYSTEMS

Power supply: **230 VAC 50-60 Hz/24 VDC**
